

**** JSI Telecom requires that you pass a Police Information Check (PIC) ****

COMPANY

JSI Telecom has an over 40 year history of success, stability and profitability with a reputation for engineering excellence and high customer satisfaction. We employ approximately 300 people working in the niche market of telecommunications applications for the worldwide Law Enforcement and Intelligence communities. Our products are mission critical, enterprise class systems, engineered to work where failure is not an option.

CANDIDATE

You demonstrate a history of personal excellence. Software development is your passion, hobby and career. You program for fun, take things apart to find out how they work, and can even put them back together in working condition. You have respectful, accurate and well developed communication skills. You know cool isn't cool unless it works fast, reliable and under extreme conditions.

JOB SUMMARY

Successful candidates will be given the opportunity to contribute, as part of our agile teams in which team work, open communication and discussion are encouraged. They will participate in active mentoring with team members to facilitate and encourage professional growth.

JOB RESPONSIBILITIES:

Solutions QA

You will be testing complex, cutting-edge software that uses a wide variety of technologies, which offers you the opportunity to develop your technical and testing skills on the job. You will collaborate with other testers, developers, product owners, and managers to deliver an excellent product that meets and exceeds customer expectations. Your experience and training is less important than your mindset; JSI is looking for individuals who actively seek opportunities to grow and develop.

Successful candidates will be given the opportunity to contribute, as part of our agile teams in which teamwork, open communication and discussion are encouraged. They will participate in active mentoring with team members to facilitate and encourage professional growth.
